

Acrylics & Reline

ProCure Custom Tray Dental Resources

ProCure wafers are easy to fabricate, dimensionally stable and have excellent rigidity. Simply place spacer material onto a study model, remove the wafer from its light proof package, mold into place, trim while soft, and then place into a light oven to cure (the ProCure Oven is excellent for this use). Fast and easy.

50 Light Cured Wafers/box, Blue **71-4930** **\$78.99**

Pro-Form Tray Material Dental Resources

A vacuum formable material that makes a strong, stable custom impression tray at a very reasonable price. Packaged 25 sheets of material with spacer foam, the tray material can be quickly & easily made into an excellent custom tray. Spacer foam is used to provide space for final wash impression material.

.125 Thickness **51-9617390** **\$16.99**
.150 Thickness **51-9617410** **\$16.99**

Pro-Line Quik Tray Dental Resources

The latest in custom impression tray material. It is a moldable thermo-plastic, easy to form, easy to cut, and can be used directly in the mouth. No models necessary (unlike other methods of tray production). Excellent for Crown and Bridge trays.

20 wafers/box Upper Shaped Tray **71-4945** **\$76.99**
Lower Shaped Tray **71-4946**

Pro-Tray Beads Dental Resources

Excellent for making a quick custom impression tray. Simply use a scoop of beads, dump into hot water, let them gel together, and then mold beads into a solid impression tray. Works great instead of impression putty when used in a prefabricated tray.

1 lb. Jar **71-0560** **\$31.99**

Temporary Crown Matrix Buttons Advantage Dental Products

Soften in hot water. Form button around the tooth or teeth to be prepped. Blow air to harden. Hard yet flexible thermoplastic. For temporary crowns/ bridges.

72/box **52-743** **\$49.99**
