

the right chemistry
can make all the
difference in...

extended
durability.

N'Durance
nano-dimer conversion technology™
the revolutionary nano-dimer composite
for anterior and posterior restorations.

0.25gm Unit dose tips &
4.5gm syringes available in 19 shades.

\$149.99

52-3000 (01-C3000) Kit w/Self Etch
Contains: 35 - 0.25 gm unit dose tips of 7 shades,
1 - 5 ml bottle ImageBond SE & accessories.

\$152.99

52-3005 (01-C3005) Kit w/Total Etch
Contains: 35 - 0.25 gm unit dose tips of 7 shades,
1 - 5 ml bottle SeptoBond, 1-4 gm 40% SeptoEtch,
accessories.

N'Durance, utilizing two distinct new technologies – a unique nano technology and a proprietary dimer acid chemistry – delivers naturally beautiful smiles that wear even more beautifully. Now, for the first time, superior esthetic restorations with superior strength, durability and wear resistance can be simply achieved.

- Deeper Polymerization
- No Post-Operative Sensitivity-Less Stress*
- Tight Contacts
- Simple price - offers outstanding value
- Simple System - 7 Shade System Kits for TE or SE Technique (full Vita™ shade spectrum available)
- Beautiful Results

Clearfil Majesty Esthetic Kuraray Dental

A light-cure, radiopaque restorative composite resin that contains a proprietary nano-filled composite filler and a high refractive matrix. The high refractive matrix exhibits a **light diffusion property** that creates the translucency light transmission of natural teeth. High polish and easy to shape and handle with a **time-saving mono-layering technique**.

Clearfil Majesty™ Posterior Kuraray America

Very high physical properties; 92wt% filler with nano-sized alumina and glass-ceramic components. Superior surface wear resistance; excellent for occlusal bite stability. Very low polymerization shrinkage; minimal marginal micro-leakage and staining. Sufficient shades for any need; 6 shades. Ideal material for amalgam alternative. Proprietary new filler surface coating technology that enables a larger quantity of nano-filler particles to be dispersed in the resin matrix, resulting in the industry's highest filler loading composite.
