

Prime-Dent® Etchant Gel

Prime-Dent

Prime-Dent® Etchant Gel 37% phosphoric is a medium viscosity etchant gel used for etching enamel and dentin prior to bonding procedures. It is thixotropic, stays where placed and will not run. Does not dry out and has a long shelf life when properly stored. Washes off clean.

Available in several syringe and bottle deliveries.

Silica Free Kit**.38-793SF \$37.99**

Contains: 50 mL, 20 tips, 3 empty refill syringes

You can find this & more Prime-Dent products on page 113.

iBrite Paint-On Whitening Pen Pac Dent

Stylish whitening pen containing 12% Hydrogen Peroxide gel, providing professional whitening without the hassle of in-office treatments or bleaching trays. Easy-to-use twist-click pen with accurate sponge-tip or brush-tip applicator makes it convenient and extremely effective. Visibly whiter teeth in 2 weeks with minimal sensitivity. For users with known history of sensitivity issues, the included lip retractor should be used prior to each application.
